

**US Army Corps
of Engineers®**

Sebewaing River, MI

Project Features

- Located on Saginaw Bay in the thumb of Michigan on the west shore of Lake Huron, about 20 miles northeast of the mouth of the Saginaw River.
- Authorization: River & Harbor Act of 3 Jun 1896.
- Shallow Draft recreational project.
- Project depth is 8 feet.
- Over 15,000 feet of maintained Federal channel.
- Dredged material has been placed in the Sebewaing Confined Disposal Facility, but it is currently very close to capacity.
- Major stakeholders include the Village of Sebewaing, Michigan DNR and Crooked Creek Marina.

Project Needs

- Requires periodic maintenance dredging on a 3 to 5 year cycle of approximately 50,000 cubic yards. This river has not been dredged since 1996, and is currently in critical need of dredging.
- Navigation structures are primarily maintained by Government floating plant.

Consequences of Not Maintaining the Project

- Loss of jobs locally.
- Loss of recreational and charter fishing in the area.

Transportation Importance

- This project serves as an important Harbor of Refuge as well as charter fishing and recreational navigation interests.
- The local community has established a significant infrastructure around the harbor facilities that generates income from harbor users and visitors to the area.
